

FUTURE SHOCK

Our Senior year raced swiftly by,
At last our final day is here.
It's time to go our separate ways,
And leave the friends we've kept so near..

This year has been a hectic one,
Each day brought a new event.
Ball games, banquets, the Senior Prom,
Suddenly they came, then went.

In the midst of mass-confusion,
We decided what to do.
Should we go to college, or get a job,
When our high school days are through?

Soon we all will graduate,
They'll march us down the isle,
We'll try to fight that urge to cry,
And somehow force a smile. -NJ-

When it's over we'll say good-bye,
We'll leave this place, the door will lock.
I hope a doctor's close at hand,
To cure my case of FUTURE SHOCK.

National Honor Society has been working on several projects during these last weeks of school.

Their most recent project was a display in the case by the typing room, to honor the senior class.

As a service project, NHS collected money for the American Cancer Society.

A quilt was raffled with the proceeds of \$82.00 being given to NHS member, Mike Curnes, to help him with his "Up With People" expenses.

To raise money for NHS scholarships and to clean up the community, a recycling drive was held with a profit of \$117.96. -T.L.T.

The FLC held its final meeting to elect officers for the '80-'81 school year last Thursday. The club also bade goodbye to the departing seniors and Carole Bonnetete; our French Amity Aide.

The new officers for next year are: President, Tracy Schussler; Vice-President, David Erne; Secretary, Carrie Sullivan; Treasurer, Kris Smith; Upper Points Chairman, Garin Andrews; Lower Points Chairman, Rick Newby; Social Chairman, Tammy Laven, and Scrapbook Chairman, Nancy DeHass.

The club also held a baked foods sale and white elephant auction Saturday at Irwin Drug. The proceeds went to help pay club expenses.

TEACHER FEATURED

Donald Kissinger has been teaching physical science classes at GHS for 20 years or as he says, "I've been confined to this (science) room for 20 years."

Mr. Kissinger was born in Orofino and raised in Spokane but spent several years in Grangeville with relatives and eventually graduated from GHS in 1953. He received his BS in electrical engineering at Washington State University and later earned his MS in physics at the University of Idaho.

Mr. Kissinger likes teaching and believes that the students are "alright." He's experienced everything from being shot with squirt guns to being told he can't see his belt buckle. "But," he quoted, "the true test of my sterling personality is really my ability to survive the caustic atmosphere that I encounter daily in the teachers' lounge."

His four children, Scott, Anne, Bob and Dave have all graduated from high school and are in college or working.

Skiing and trap shooting are just a few of Mr. Kissinger's hobbies. He Also enjoys archery and backpacking.

Mr. Kissinger is looking forward to teaching next year but right now he'd just like to find a job for the summer.

"Ya big sissy!"
